

Nationwide Criminal Court Records: Fast, Reliable, and Built to Scale

Criminal court records are essential for evaluating risk and making informed decisions—but fragmented systems, inconsistent access, and manual bottlenecks make it difficult to get timely, accurate nationwide results at scale.

InformData blends smart automation with manual reach to deliver fast, reliable court records coast to coast.

What You Can Expect

- **Expansive Automation Coverage**

Our carefully curated and vetted automation library spans thousands of counties—improving consistency and reducing turnaround times while improving quality.

- **Flexible Search Options**

Tailor your search strategy with flexible options—County Criminal, Statewide Criminal, “+ Lower Courts,” and Federal Criminal—to meet varying needs and uncover records across complex court structures.

- **Smart Retrieval Logic**

Every order is routed through the most efficient method based on jurisdiction-level rules, access types, and historic performance.

- **Maximum Uptime**

Ensure continuity with built-in automation redundancies that seamlessly switch to alternate paths when one slows or stalls.

- **Real-Time Transparency**

Get clear visibility into record status, court access type, and turnaround expectations at every step of the process.

Efficient. Accurate. Scalable.

Managing multiple providers or a patchwork of court researchers often leads to inefficiency, inconsistent quality, and limited visibility. InformData takes a different approach—treating criminal record retrieval like a supply chain.

By combining automation with manual expertise and focusing on key metrics like access, accuracy, and source quality, we help you **scale smarter, reduce overhead, and improve outcomes.**

The payoff? Faster turnaround, lower total cost of ownership, and consistent results you can rely on.
