

National Criminal Data Designed for Strategic, Comprehensive Screening

With an increasingly mobile and decentralized workforce, relying solely on county criminal checks leaves employers exposed. National visibility is key to closing critical visibility gaps and managing risk.

NatCrim bridges jurisdictional gaps with actionable data that drives effective screening strategies.

What You Can Expect

- **Nationwide Criminal Coverage**

Access over one billion records from county, state, and federal sources to surface critical information across jurisdictions.

- **Fresh and Timely Results**

Access relevant, current results, powered by daily refreshed preadjudicated records and regularly updated court and other data.

- **Rich, Actionable Data**

89% of records include charge descriptions, and 79% contain full or partial DOBs—fueling more informed follow-up checks.

- **Flexible Client-Tailored Controls**

Fine-tune results using filters by name, DOB, date, record type, and more—plus create client-specific profiles that match different risk levels or workflows.

- **Boost Accuracy with SSN Trace+**

Pair NatCrim with SSN Trace+ to enhance search accuracy and link criminal records more confidently to individual identities.

A Targeted Approach to Screening

- ✓ **Uncover Hidden Risk**

Surface criminal insights nationwide to effectively guide county-level searches—ideal for gig, remote, or cross-state hires.

- ✓ **Adapt to Varying Roles**

Align search scope and filters to specific job functions or risk thresholds—ideal for dynamic, safety-sensitive, and security-sensitive roles.

- ✓ **Support Confident Decisions**

Equip teams with the insight and context they need to identify risk and act decisively—reducing delays, uncertainty, and exposure.
