InformData®

Actionable up to the minute continuous activity monitoring.

- 95+% U.S. population court record coverage

- 100,000+ new records added every day

- Records added/updated 1440 times each day

Reduce Risk with CAM

If your clients operate in regulated industries or serve vulnerable populations, real-time continuous activity monitoring is crucial. The InformData Population Management module simplifies the deployment and maintenance of actionable continuous activity monitoring. It's a "set it and forget it" solution—we'll notify you immediately when something requires your attention.

CAM shifts your risk management strategy from reactive to proactive by providing real-time notifications of disciplinary actions. It transforms one-time transactional screening into continuous monitoring that works quietly in the background until action is needed.

✔ Up to the minute, continuous activity monitoring

✔ 85%+ U.S. incarceration facilities covered

✔ Direct-source data you can trust

✔ 60% of records include social security numbers

✔ Proactive notifications. Nothing for you to sit and watch

Inform yourself.

"

"Only 11 percent of organizations rescreen current employees… Even these periodic checks—done once a year, for example—can mean employers are blind in the interim."

- SHRM, "MORE EMPLOYERS TRY CONTINUOUS BACKGROUND SCREENING"
